

Lap Band Surgery

Lap Band Surgery

Lap Band surgery is a consideration for people fighting being overweight that has changed many a life.

TopSurgeons, who performs more successful Lap Band surgeries than anyone else in California, has changed the lives of many individuals who battled weight problems for years.

The Lap Band is a restrictive procedure that received the support of the U.S. Food and Drug Administration (FDA) nearly a decade ago. The procedure has been widely used in Europe and Australia since 1993, giving individuals an opportunity to regain control of their weight battle.
